

Eliminate the Data Analysis Gap Overnight with SmartCare®

Healthcare reform makes data analysis a mission-critical step. SmartCare:

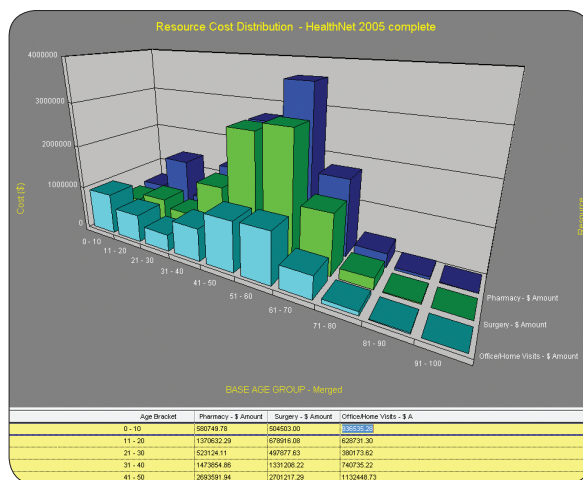

- Can merge Electronic Medical Records with Claims Data
- Reduces analysis time from hours to seconds
- Reduces the implementation time from months to days

It is 6 systems in 1:

1. Data Warehouse
2. Data Drilldown and Mining
3. Report Writer & Library Builder
4. Ad-hoc Query
5. Statistical Analysis
6. 3-D Graphics

It produces reports and provides analytics for:

1. Pay-for-Performance
2. Quality & Core Measures
3. Clinical Integration
4. Predictive Modeling
5. Contract Analysis
6. Provider Profiling & Benchmarking
7. Disease Management
8. Claim Review
9. Resource Utilization

It automatically transforms your data:

1. Into Episodes-of-Care
2. Shows practice patterns from every conceivable angle
3. Has 250 user-definable demographic, clinical and administrative fields
4. Integrates and cross-reports electronic medical records with claims data now

It is an exceptional value:

1. Analysis that used to take hours or days now take seconds. Users can explore the data as much as they like in their own way, confident that the results will arrive in seconds and be displayed with striking graphs.
2. It can drilldown into practice patterns, and show how financial and clinical patient data interact.
3. It is an entire research department in a box, able to generate hundreds of thousands of custom reports.
4. While comparable systems can take from 6-12 months to implement, a SmartCare implementation can take less than 2 weeks, including data conversion.
5. Since it was designed to be shared by clinical and financial departments, it is perfect for Accountable Care Organizations and HIEs.
6. It can merge all types of claims, electronic medical records, patient survey, and plan membership data into a unified knowledge base that can be your enterprise-wide data platform.

SmartCare® is the complete Business Intelligence software solution.
